

COMPUTED/E1 — van der Pol zero-energy reversible periodic orbits

$r = 0.08$, $\varepsilon = 1$, $a_2 = 0$, $a = 1$, $d = 4.096e-05$

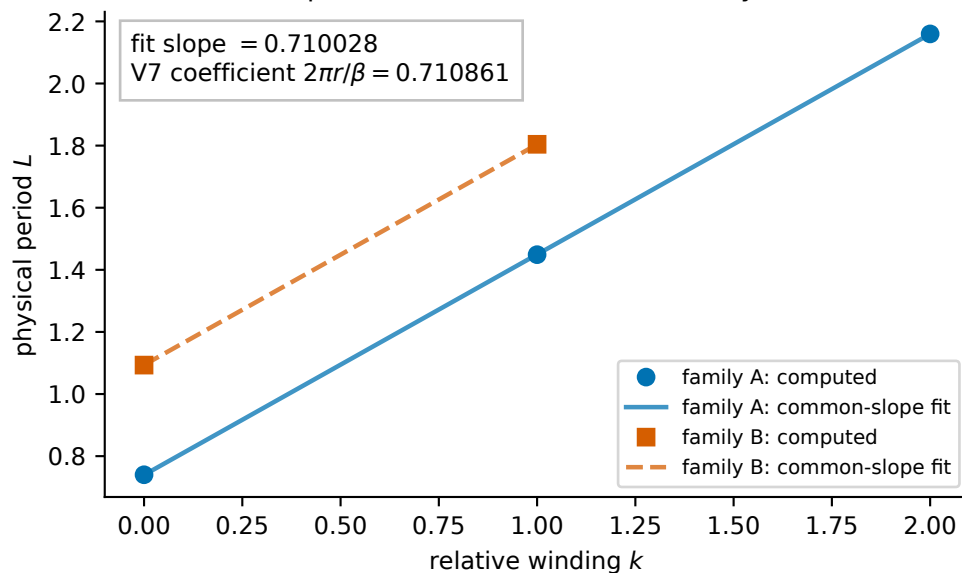

physical profiles, family A (color/style = k)

local saddle block $\|Z\| < 0.25$: color/style = k

period law (marker/color = family)

closed physical action (exploratory convergence signal)
