

V4/V5 — COMPUTED/E1_MATCHED_CANDIDATE: nonlinear- $W^U \rightarrow$ central $\rightarrow$ resolved- $K_1 \rightarrow$ outer independent finite-horizon Gamma check — NOT_INTERVAL_VALIDATED

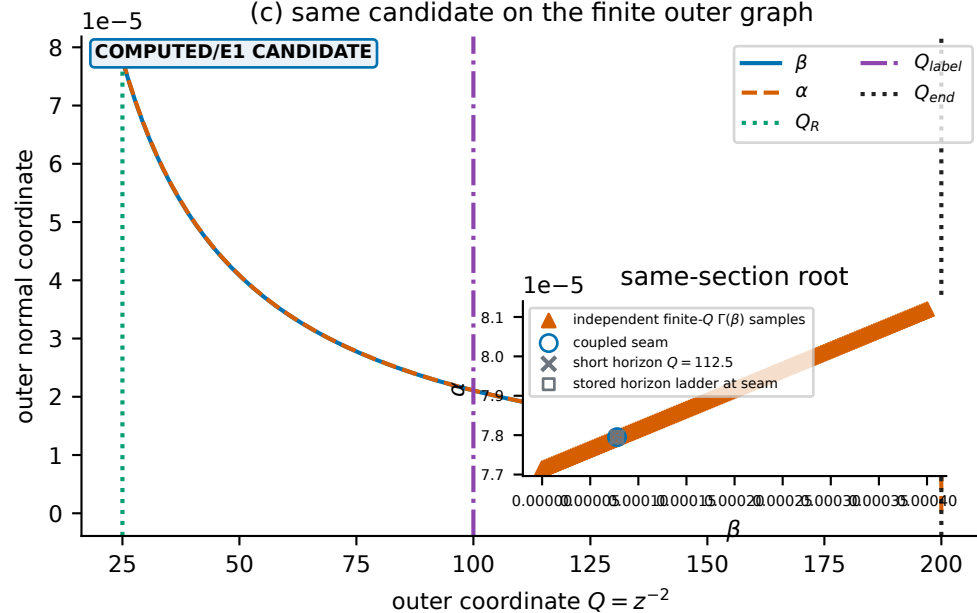

(a) nonlinear source $\rightarrow$ central cut

(b) central interface $\rightarrow$ fixed- r_1 seam

(c) same candidate on the finite outer graph

(d) finite diagnostics versus unfinished theorem objects
