

V5A — MATCHED FINITE-HORIZON SAME-Q CANDIDATE: scaled densities and complete counterterms finite Q only — improper limits and uniform covariance NOT_INTERVAL_VALIDATED

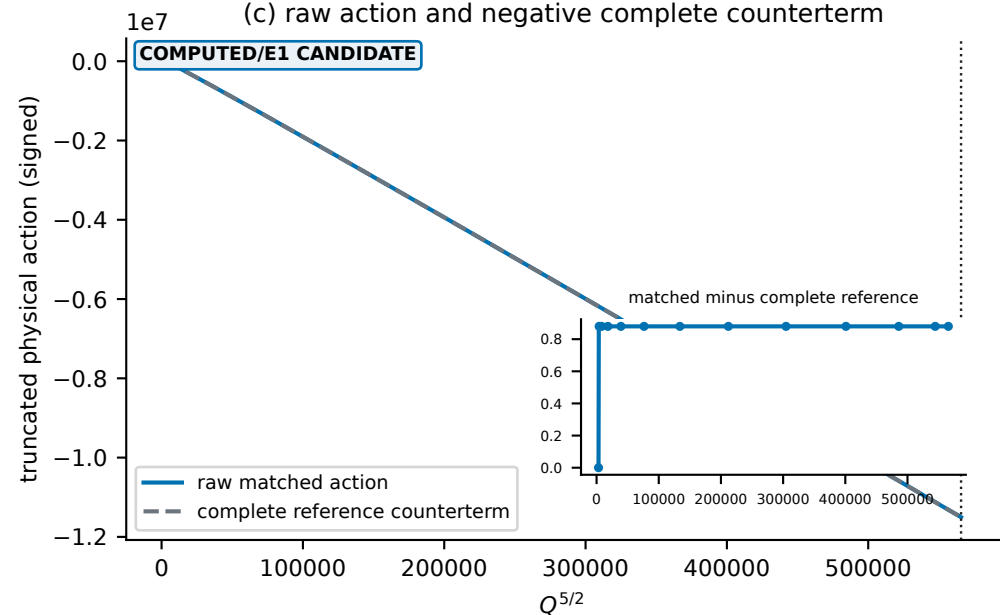

(a) exact densities with finite predicted scaling

(b) raw length and complete reference counterterm

(c) raw action and negative complete counterterm

(d) cutoff, grid, horizon, and covariance QA

COMPUTED/QA, ONE NOT RUN

	value / status
cut additivity (max)	5.28e-17 PASS
reference change	4.86e-17 PASS
gauge coboundary	0.00e+00 PASS
output-grid Δ length	3.57e-08 PASS
output-grid Δ action	1.19e-03 PASS
outer-only horizon Δ action	2.82e-04 INCONCLUSIVE
terminal-potential transfer	— NOT RUN

grid threshold = $2e-3$; balance threshold = $1e-8$
horizon row is an independent outer-only proxy
