

SCHEMATIC: stationary spatial dynamics; geometry and distances are not quantitative
finite auxiliary exits

return branch
another high-winding visit

source collar Σ_{T^*}

high winding $n \gg 1$

saddle--focus O_u

outgoing first-event cell

algebraic future-staying sheet

$U \rightarrow +\infty, X \rightarrow +\infty$

pole: $U \rightarrow +\infty$

$X \rightarrow X_b < \infty$

algebraic matching bridge

finite cut/lateral exits
